

What is our school made of?

Key Vocabulary:	
suitability	The quality of being right or appropriate for a particular purpose.
squashing	Squashing is pushing things closely together.
bending	Bending is changing the shape and direction of something.
twisting	To twist something you move one part clockwise and the other part anticlockwise.
stretching	Stretching is to change shape by pulling it to make it longer or wider.

Sticky Knowledge facts:

- ♦ Most of the paper or cardboard we use came from trees.
- ♦ Glass is a hard transparent material that can be made in many shapes. It is usually transparent, which means you can see through it, but can also come in different colours.
- ♦ John McAdam is most famous for inventing the tar used to make roads. It was known as Tar McAdam.
- ♦ Plastics are used to make many of the things we use in everyday life. They are used for toys, bicycle helmets, mobile phones, window frames and many other common items.
- ♦ Petrol is used to make plastic and it invented just over a 100 years ago.
